PROFESSIONAL EXPERIENCE

D-Brick <i>Co-Founder & Tech Lead</i> - Built an automated scraping pipeline monitoring 500+ daily listings across Vinted and eBay to surface underpriced LEGO Architecture sets. - Integrated Claude API for multimodal AI classification of unlabelled listings, cutting manual review effort by ~80%. - Developed a Telegram alert bot delivering real-time notifications with margin calculations; identified 50+ arbitrage opportunities per month. - Designed and developed the company website; automated inventory and transaction database recording to streamline operations.	Jan 2026 – Present
Erasmus School of Economics — Erasmus University <i>Teaching Assistant</i> - Supported weekly lectures for 30 undergraduate students; evaluated 30+ presentations per bimester with structured written feedback. - Provided group tutoring across 2 bimesters on quantitative methods and digital marketing concepts.	Mar 2026 – Present
Elmec Informatica S.p.a. <i>Business Intelligence Data Analyst</i> - Executed 50+ SQL queries per month to extract and process datasets of 10M+ records, supporting cross-departmental decision-making. - Developed 10+ ETL procedures per month and built an internal reimbursement monitoring app, generating €20,000+ in annual cost savings. - Designed 50+ dashboards and reports in Qlik used by 70+ stakeholders across 5 departments; one weekly sales report reduced analysis time by 50%. - Delivered 10+ presentations annually to senior management, translating complex data findings into actionable strategic recommendations.	Apr 2023 – Aug 2025
Shopfully S.p.a. <i>Strategic Partnership Intern</i> - Drafted 50+ advertising campaign reports for 30+ clients and built 10+ Tableau dashboards enabling data-driven decision-making. - Managed relationships with 30+ business partners, supporting long-term collaboration and account growth.	Jul 2022 – Feb 2023

EDUCATION

Rotterdam School of Management — Erasmus University <i>MSc Data Science and Marketing Analytics</i> Thesis: The Role of Emotion in AI-Mediated Customer Service (TWFE panel regression, NLP pipeline, ~380K Google Play reviews)	Sep 2025 – Present
University of Insubria <i>Bachelor in Economics and Management — Grade: 9.5/10</i> Thesis: Air Pollution and Health — a statistical-spatial analysis of Emilia Romagna	Sep 2018 – Oct 2021

PROJECTS

Moneyball 2.0 — Football Transfer Value Prediction <i>Machine Learning Research Project</i> - Scraped and merged 1,835 player profiles from 5 top European leagues using a two-tier pipeline (performance stats + Transfermarkt market values via fuzzy matching). - Engineered contextual features (Squad_Tier, Years_Left, Top_Nation) and applied K-Means clustering (K=4) to build data-driven player profiles beyond traditional positions. - Trained and compared a Random Forest ($R^2=0.77$) and a Neural Network ($R^2=0.79$); selected RF for interpretability, uncovering the "Rich Club Tax" as the dominant transfer value driver. - Generated a Top 10 arbitrage target list for Sporting Directors, identifying opportunities including a €20M undervaluation on Jadon Sancho.	2025
UNICEF Donor Retention — ML Churn Prediction <i>Academic Research Project — Erasmus University</i> - Built an end-to-end R pipeline (logistic regression + XGBoost + SHAP) to predict donor churn across ~6,000 UNICEF donors, with focus on "fragile donors" — high-capacity, early-tenure, low-satisfaction profiles. - Identified donor alignment as the strongest NPS predictor; developed a Silicon Sampling LLM simulation to test retention interventions on synthetic donor personas.	2025
ZenIQ — Garmin Meditation & Relaxation App <i>Independent Development Project · Monkey C</i> Designed and developed a meditation and relaxation app for Garmin wearables in Monkey C, published on the Garmin Connect IQ Store.	2025
Stroke & Heart Attack Risk Model — University of Insubria <i>Undergraduate Research Assistant</i> - Supported a team of 7 analysts processing 1,000+ medical data points in Excel and RStudio to build a statistical predictive model. - Model was adopted by hospitals in Canton Ticino (Switzerland), contributing to faster clinical intervention for 50+ patients annually.	Jan–May 2022

LANGUAGES & SKILLS

Languages: Italian (Native) · English (C1 — IELTS 7.5)
BI & Visualisation: PowerBI · Tableau · Qlik · Looker · Excel
Data & Cloud: SQL · BigQuery · ETL pipelines
Programming: Python · R · BeautifulSoup / Scrapy
Dev & Tools: Git / GitHub · Monkey C · PowerPoint · Word

INTERESTS & ACTIVITIES

Chess: 1600 Classic Elo (chess.com) · **Football:** Team captain, 10 years of competitive experience · **Astronomy:** Completed observatory course (Varese) · **Theater:** Performed in 3 stage productions · **Volunteer Work:** Elderly care support at a nursing home
